

Magnetar All Out Seed and Soil Treatment Use:

For Seed:

Always dilute Magnetar first in water. Then add second component of additional water or other seed treatment.

240 wheat bushel example:

Step 1: Dilute 5 litres of Magnetar in 10-15 Litres of water (5 gallon pale).

Step 2: Then add additional 15-18 litres of extra water or other seed treatment product to diluted Magnetar to make a total slurry of 30-35 Litres.

Apply 30-35 Litre slurry to 240-250 bushels of seed.

lbs of seed to treat	bushels of wheat	Litres of All Out Seed	Litres Water to add	Additional H2O or other seed treatment to add to mix	Total Slurry-L
14700	245	5	13	18	36
29400	490	10	26	36	72
58800	980	20	52	72	144

With Starter Fertilizer:

Step 1: Always dilute Magnetar first in water. Dilute 5 litres of Magnetar in 10-15 Litres of water

Step 2: Add diluted Magnetar to fertilizer and mix. Apply to 40 acres.

Magnetar Foliar use: Foliar Application

Step 1: Always add Magnetar first to half filled tank with agitation. Then add chemicals. 10 Litre jug will treat 80 acres.
