

Don't gamble with your pulses

Phos Vegas is a new granular starter fertilizer designed to provide a highly available, seed safe, total nutrient solution, in each prill. *Your jackpot harvest awaits!*

Benefits

Phos Vegas 9-38-5-0 with calcium and chelated micros is the full package with every prill. It helps maximize plant growth by allowing the roots access to much needed macro and micronutrients early on in seed growth and throughout growing season.

Improved efficiency and reduced tie up of Phosphate through the use of our proprietary enhancement coating, Caribou Coat.

Excellent granular hardness and dust free for optimal handling
